

PSI Pax, Inc. Achieves CMMI ML2

FOR IMMEDIATE RELEASE

June 23, 2010

California, MD – PSI Pax, Inc. (www.psipax.com) proudly announces it has successfully demonstrated compliance to SEI CMMI® Maturity Level 2 in its recent appraisal. The CMMI® criteria objectively measure the efficiency of an organization's development processes, thereby defining specific initiatives that improve software development. This rating solidified PSI Pax's continued commitment to following proven software development processes and policies from initiation through implementation. PSI Pax provides resources for measuring, monitoring and managing development processes following a software development life cycle. The PSI Pax CMMI toolkit includes tools and examples of how to realistically implement standardization to current and future projects.

"Our quality processes result in prevention and reduction of problems," reports Robert Hor, Vice President of Operations. "Savings are achieved by the customer through project efficiencies from improved service level performance, reduced overhead, increased predictability in meeting milestones and decreased time to complete tasks."

"Earning our CMMI® Level 2 appraisal signifies a major milestone in PSI Pax's commitment to providing our customers with the highest quality IT and enterprise solutions," said Nasser Basir, President. "This is a significant undertaking for a businesses of our size. We continue to actively pursue further CMMI ratings."

Appraiser Dr. Leigh Riley, of the Acme Process Group, commented on the expedited process, "Management support, organizational buy-in, and an exceptional process improvement group were instrumental to PSI Pax's success."

About PSI Pax: PSI Pax is an innovative technical services business with 140 employees, providing customers with the IT, engineering, and program management skills necessary to manage the development and operations of mission-critical systems. They design, integrate, maintain, and upgrade systems for national defense, intelligence, infrastructure and other high-priority government missions. The company continues to distinguish itself by building on its values of People, Service and Integrity.

About CMMI Rating: The Capability Maturity Model Integrated (CMMI) is a process improvement approach put forth by Carnegie Mellon University's (CMU) Software Engineering Institute (SEI) that provides organizations with the essential elements of effective processes that ultimately improve their performance.
